Panel System Furniture Specifications

See below for additional product specifications not listed on the individual product page(s).

Acoustical Panels (General Information):

Standard panels are 1¾" Thick, while **Raceway** and **Powered panels** require 2" depth for clearance.
Raceway panels are designed for use as cable pass-through for **Powered panels**.

Materials

3/4" Industrial board septum laminated with 1/2" sound deadening board, wrapped in 100% recycled acoustical performance polyester textile that meets ASTM-E-84 class 1.

All standardized Custom Office Design textile offerings adhere to the following performance guidelines as defined by the Association for Contract Textiles (ACT)

See Guilford of Maine product listing for exact product details

See supplementary Standard Materials Reference document for available wood finishing and textile options. The wooden components of both 2.0 and SB3 Panel Systems can be stained to match most standard wood grain laminate finishes.

Note

Providing a floor plan with your quote request will help to ensure we provide you with all the components you will need for your project.

2.0 Panel System

A Panel-to-panel system where each panel features a wooden top cap with 5/8" radius.

While 2.0 Panels can only be connected to one another using a PTP-1 connector between them, 2.0 Panels can connect directly to 2.0 Posts/Ends/Caps without the use of these connectors.

SB3 Panel System

A Panel-to-Post system where each panel features a Wooden Top Cap with 1/8" Radius.

By design the panels in this system can only be connected to Posts, and can not be connected like the Panel-to-panel system.
